03. autonomy and recharge

drive of up to 298 km⁽¹⁾

With just one charge, you can travel up to 298 kilometres⁽¹⁾. It's enough for those driving around town, with no need to charge more than once a week⁽¹⁾, and complete freedom to follow your routine.

With eco mode and regenerative braking, range is optimized by up to 9% so you can drive for longer. Better energy efficiency thanks to the E-Tech technology so that you can go further and further.

(1) WLTP, for 100% urban driving.

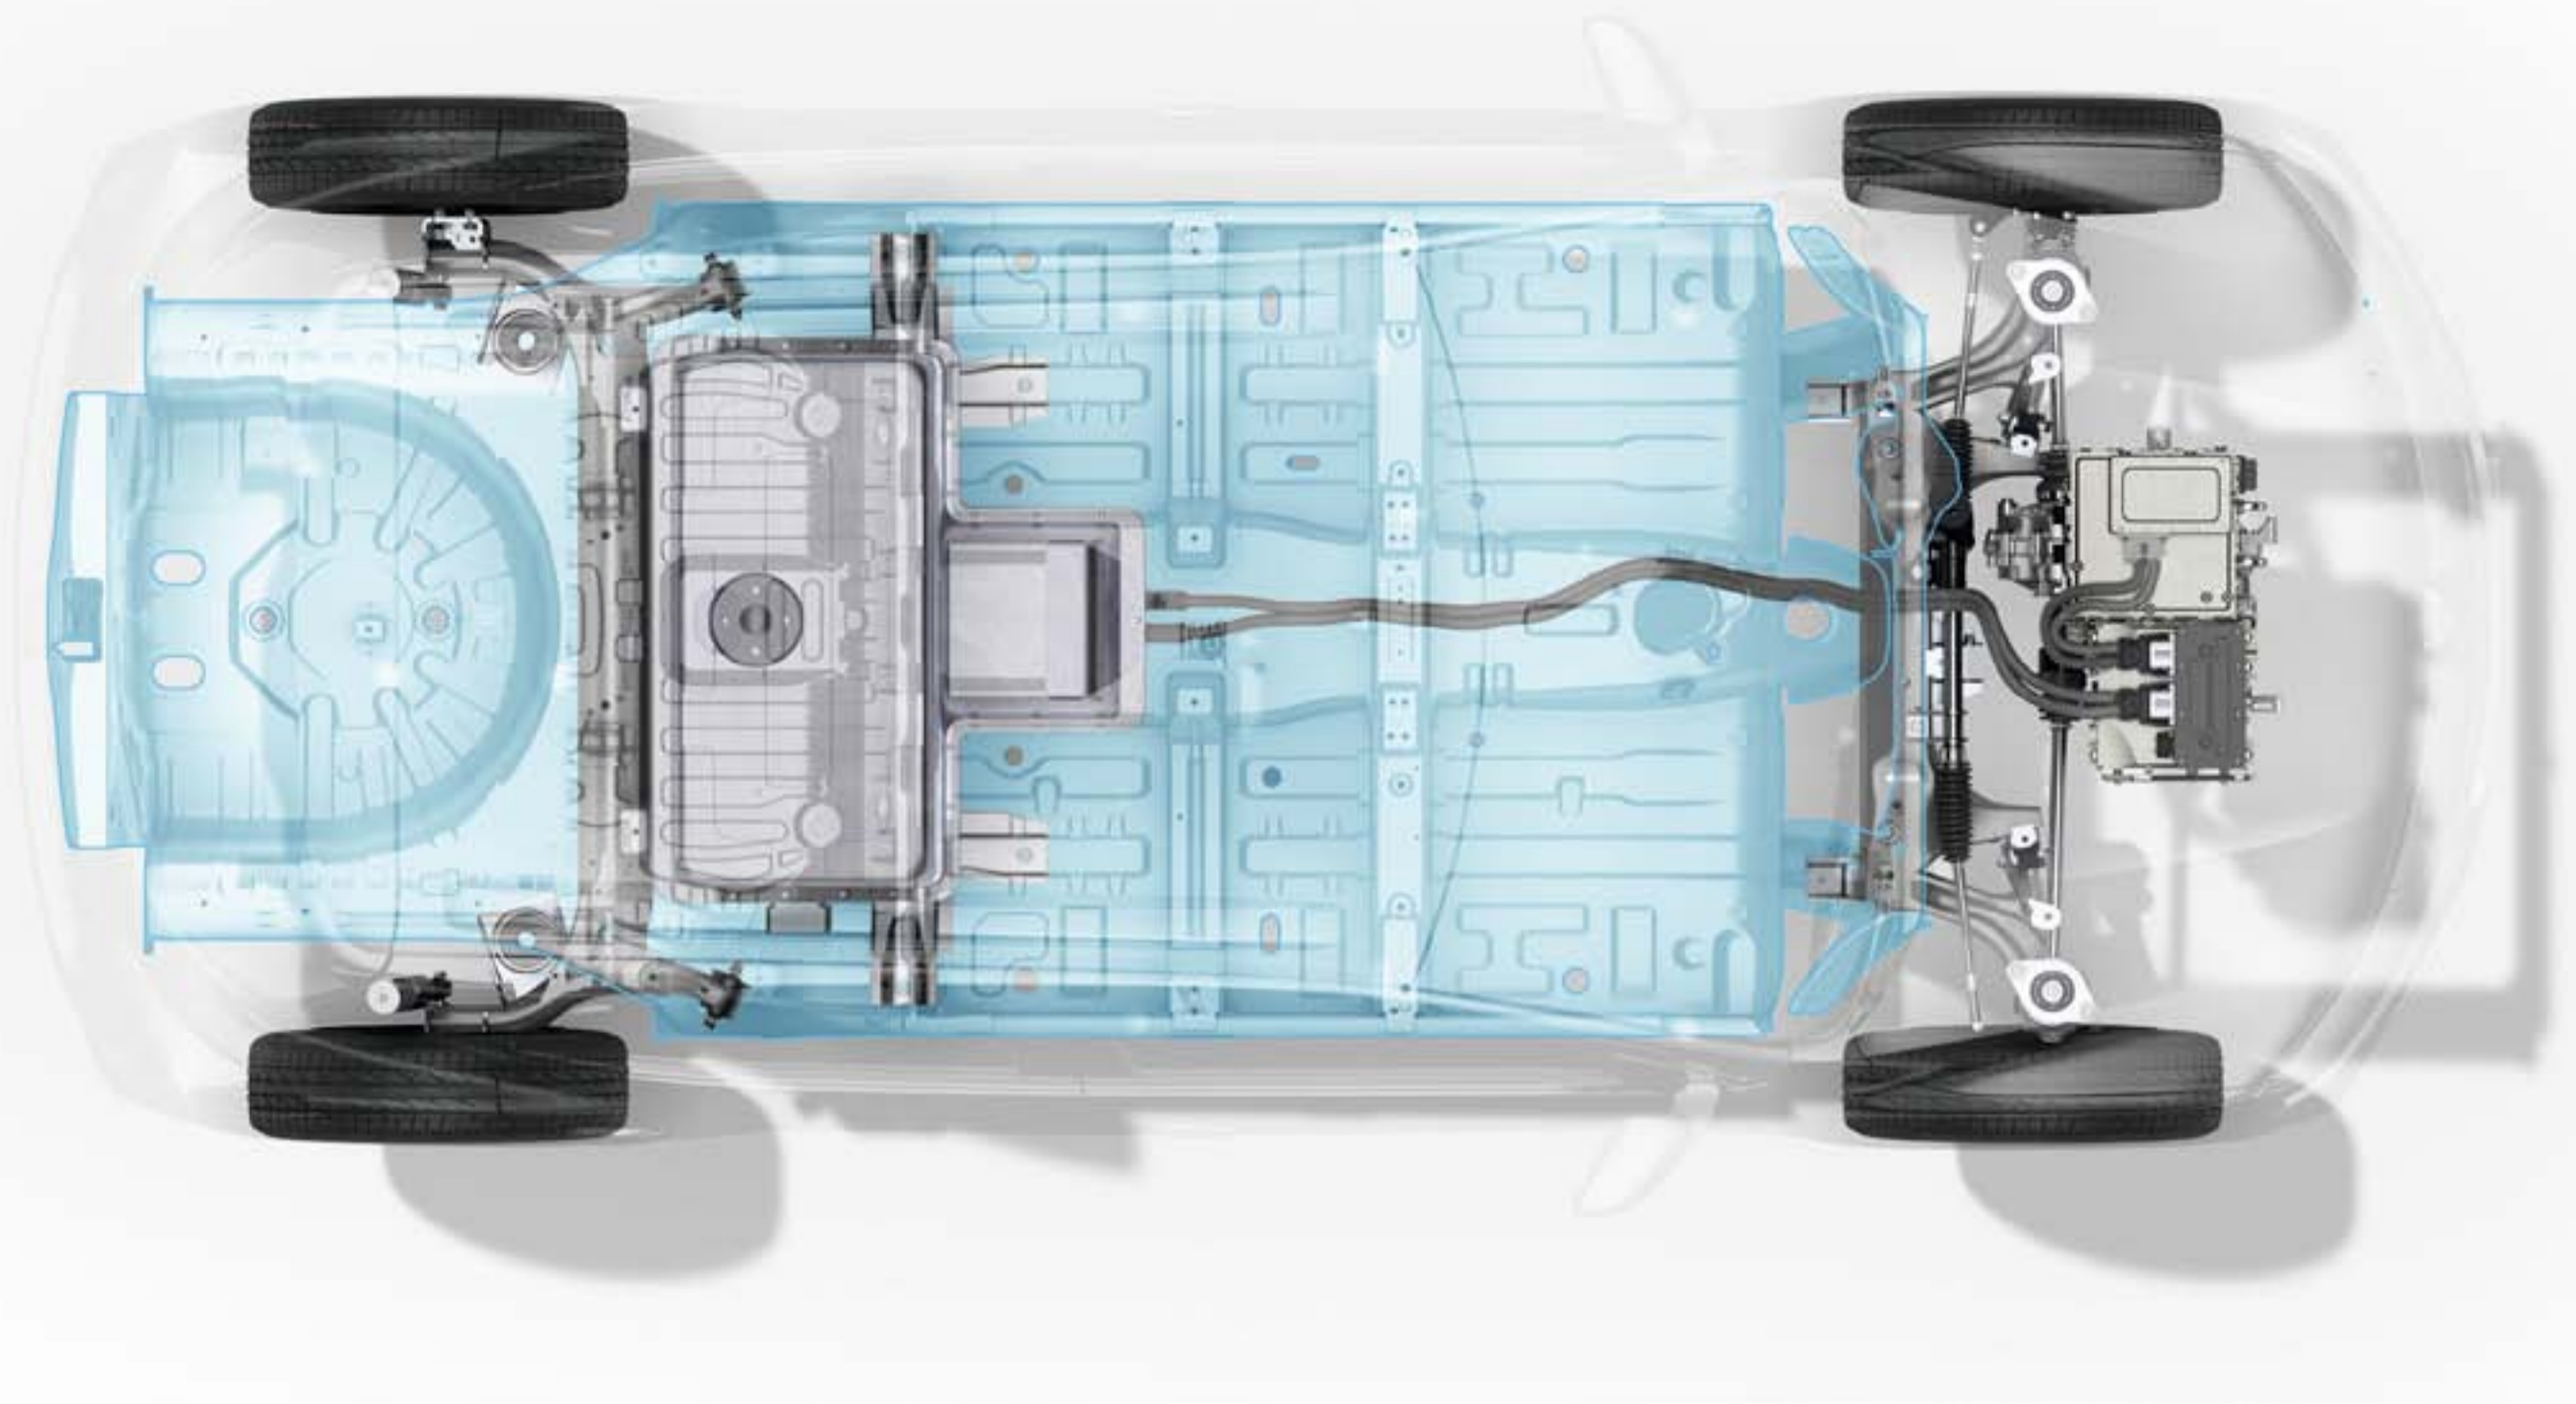

03. autonomy and recharge

charge where you want, when you want

To charge the new Renault Kwid E-Tech 100% electric, all you need is a domestic socket⁽¹⁾. For faster charges, you can also use a wallbox or any other fast charging station. And to recharge during your journeys, you can plug to the public or DC fast charging stations, it takes just 40 min⁽²⁾.

(1) Mobilize Power Solutions offering. For more information about Mobilize services, go to the Mobilize services page. For more information about recharging, call **XX XX XX XX XX**.
(2) portable charging cable as standard for 127V or 220V outlets, both 20A.

05. advanced driving assistance systems

6 advanced driving assistance systems

As part of the human first program, new Renault Kwid E-Tech 100% electric is equipped with six innovative advanced driving assistance systems.

six airbags
6 airbags (2 front, 2 side, 2 curtain)

hill start assist
Hill Start Assist (HSA) keeps the vehicle stationary on slopes, giving you time to start safely without rolling backwards.

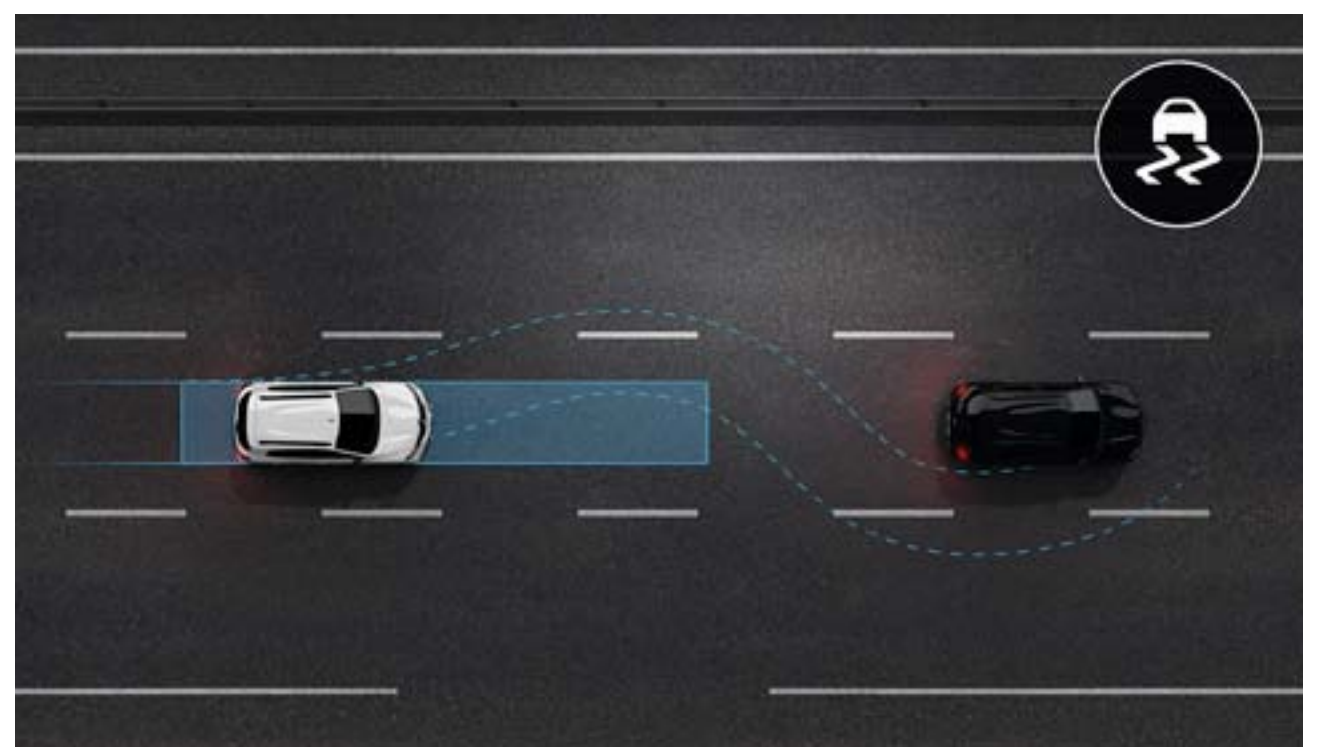

electronic stability program (ESP)
ESP is an electronic stability program that allows you to correct the course of a car, preventing it from going off the road, so that you can drive in complete safety at all times.

rear camera
Shows a rear view on the screen when you engage reverse gear. The guides make manoeuvring easier and safer.

parking sensor
The parking sensor emits an audible alert when an object is close to the vehicle, offering greater safety during manoeuvres.

ABS
The ABS brake system prevents the wheels from locking during braking, facilitating stability control.

the human first program is a comprehensive safety program developed by Renault in collaboration with researchers, experts and fire-fighters.

because road safety is the business of all road users - be they pedestrians, cyclists or motorists - the human first program by Renault undertakes to:

- 1. prevent accidents by developing safety equipment and advanced driver-assistance and safety systems**
up to 36 advanced driver-assistance systems / more than 60 pieces of safety equipment, up to 7 airbags, child seats (Isofix), Renault Fixe4sure solution / more than 2,000 safety-related patents filed since 1970
- 2. manage accidents by drawing on innovations developed with firefighters**
QRescue/Fireman Access / more than 5,000 firefighters trained in the past 10 years in 19 countries around the world / approximately 400 cars donated per year for fire-service training
- 3. reduce the number of accidents and their severity by investing heavily in R&D**
safety score/safety coach/connected services/big data/artificial intelligence systems and cybersecurity
